

Carbon Reduction Plan

Supplier name: FERRING Pharmaceuticals Ltd

Publication date: 20.03.2026

Commitment to achieving Net Zero

FERRING Pharmaceuticals is committed to achieving Net Zero emissions.

In our goal to reach net-zero emissions by 2050, we are following a robust roadmap to reduce greenhouse gas emissions across our operations and value chain. We are taking action to protect the planet, create a better future for generations to come.

In October 2023, Ferring through our ESG team publicly committed to the Science Based Targets initiative (SBTi) and plan to significantly reduce our GHG emissions by 2030, with the aim of being net zero by 2050.

Ferring is taking steps to reduce our GHG emissions. We have completed our data collection journey for our carbon assessment by calculating Scope 1, 2, 3 emissions for 2021, 2022 & 2023, using improved methodologies.

Considering the global challenges in environmental responsibility, FERRING is demonstrating that sustainability is not just a goal, but a strategic imperative for long-term success.

Gross Scope 1, 2 and 3 and total GHG emissions

	2025 (tCO ₂ eq)	2024 (tCO ₂ eq)	Base year 2023 (tCO ₂ eq)	2024-2025 (%)
Scope 1 (S1) GHG emissions				
Gross S1	32,431	30,087	30,518	7.8%
Percentage of S1 GHG emissions from regulated emission trading schemes	0%	0%	0%	-
Scope 2 (S2) GHG emissions				
Gross S2 location-based	30,173	29,203	27,868	3.3%
Gross S2 market-based	18,010	22,619	26,626	-20.4%
Gross S1 and S2 market-based	50,441	52,706	57,144	-4.3%
Scope 3 (S3) GHG emissions				
Gross S3	578,819	689,598	610,871	-19.1%
1 Purchased goods and services	293,465	353,946	338,363	-20.6%
2 Capital goods	14,143	25,937	14,934	-83.4%
3 Fuel and energy-related activities (not included in S1 or S2)	11,186	11,139	11,079	0.4%

1. Note that we have improved our GHG accounting methodology and recalculated our base year, as well as 2024 and 2025, according to the new methodology ahead of our SBTi target submission. Hence, the numbers stated for 2023 and 2024 differ from what was previously reported.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023

Additional Details relating to the Baseline Emissions calculations.

FERRING's baseline year is set at 2023. We have already signed the commitment letter for SBTi & our targets have now been validated.

Baseline year emissions:

EMISSIONS	TOTAL (tCO₂e)
Scope 1	28,215
Scope 2	25,902
Scope 3 (Included Sources)	526,081
Total Emissions	580,198

Current Emissions Reporting

Reporting Year: 2025

EMISSIONS	TOTAL (tCO₂e)
Scope 1	32,431
Scope 2	48,183
Scope 3 (Included Sources)	578,819
Total Emissions	659,433

Emissions reduction targets – Near Term

To continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

- FERRING's methodology follows the GHG Protocol – Corporate Accounting and Reporting Standard (revised edition) published by the World Business Council for sustainable development (WBCSD) and the World Resources Institute (WRI).
- 58.8% absolute GHG emissions reduction (Scope 1 and 2, market based) (2034)
- 74% of our suppliers, by emissions, to have Paris Agreement aligned reduction targets. (2030)

Emissions reduction targets – Long Term (2050)

- 90% absolute GHG emissions reduction (Scope 1 & 2 market based)
- 90% absolute GHG emissions reduction (Scope 3)
- Net-zero GHG emissions

Carbon Reduction Projects

In the future we hope to implement further measures such as:

- FERRING have already financed and implemented measures to reduce scope 1&2 emissions at local manufacturing sites
- Further energy savings as part of ISO50001 energy management certification

Completed Carbon Reduction Initiatives

- FERRING will follow SBTi requirements to set reduction targets.
- Committed to SBTi
- UK-All internal and external lighting is LED, PIR/Sensor lighting controls installed
- UK-Company fleet, one unleaded vehicle, all others are hybrid or fully electric
- UK-Electric & gas supply-renewable energy
- Denmark & Czech Republic–Solar panels
- Germany, Denmark, Czech Republic & Switzerland – Carbon neutral electricity
- Israel & Czech Republic – Energy Management systems

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Mel Foster-Hawes
